CENTRES

SCHOOL,
UNIVERSITIES
& COLLEGES

AUTOMOTIVE
INDUSTRY &
FACTORIES

The S-1 MkII is a professional electrostatic sprayer that uses the principle of electrostatic induction to distribute sanitising solutions effectively and uniformly across a variety of surfaces.

The upgraded ergonomic design of the S-1 MkII coupled with its light weight ensures that it remains comfortable to hold over extended periods. This is a critical feature, given that the lithium battery power source has a run time of several hours.

With a spray pattern that can be adjusted the S-1 is suitable for a large number of applications using various sanitising solutions. The S-1 atomises the solution to such a degree that it becomes a mist spray - extremely small and light drops. Through the electrostatic charge generated by the sprayer these drops are attracted by the targeted surface and, as they lay down they create a sanitizing coating. Which effectively reaches every point of the area to be treated.

Features:

Package:

- 16.8V Handheld Electrostatic Ready-to-Spray Sprayer.
- 1.2 ltr Tank With Gradations.
- 2No. 0.3mm & 1No. 0.8mm Interchangeable Nozzles.
- 2No. 16.8V Li-on 3000mAh Battery.
- Intelligent Charger.
- International Power Adapter.
- Hard Case.

Specification:

Theoretical Coverage	Up To 350 m
Tank Capacity	1.2 ltr standard Long Range Back Pack Available
Nozzle	Full cone
Nozzle Sizes	0.3 (40µm) / 0.8 mm (100µm)
Power Supply	16.8 volt Li-on battery 3000 mAh
Battery Run Time	7-8 Hours
Dimensions (mm)	393 (L) x 243 (H) x 108 (W)
Weight, No Battery	1.6 kg
Weight, With Battery	1.7 kg
Weight RTU	2.7 kg

Recommended Areas of Use:

- Hotels
- Airports
- Hospitals
- Shopping Centres
- Car Garages & Dealerships
- Sports stadiums
- Public Transport
- Offices
- Industrial Premises
- Educational Facilities
